

Navigator® Pro

AUTOMATIC SUCTION CLEANER

Programmed Pattern Cleaning

Features of the Hayward® Navigator Pro automatic in-ground cleaner:

- Exclusive SmartDrive® — Programmed steering moves the cleaner silently in a predetermined series of turns for more thorough cleaning. It's powered by your existing filtration system so you don't have the expense of an energy-consuming booster pump.
- Advanced Suction Technology — Utilizes the pool's existing filtration system.
- Silent Operation — No pulsating hoses or noisy parts, for a peaceful pool environment.
- Easy to use — Connects in less than 10 minutes to skimmer or suction port.

CLEANERS

High-Flow Hose

- Reduces hydraulic friction for efficient operation
- No bags to empty or replace
- Powered by existing filtration system

Hydro-Dynamic Head Design

- Designed for style, engineered for performance
- Turbine-drive system for smooth, silent operation

Vacuum Wings

- Downdraft design captures pollen, sand, twigs, leaves and pebbles

Adaptive Steering Assembly

- Guides the hose as programmed steering maneuvers the cleaner around the pool, eliminating hose tangles

Advanced Pod Propulsion

- Eliminates the need for wheels and belts
- Consistent performance and long life

Intelligent cleaning every time with SmartDrive® technology.

The Hayward® Navigator® Pro is a smart choice for all types of in-ground pools. Exclusive SmartDrive technology makes Navigator Pro faster and more efficient than any random style pool cleaner. Navigator Pro moves in a predetermined series of right and left turns to systematically provide more thorough coverage of your pool's surfaces. Discriminating pool owners will value the Navigator Pro's ability to clean their pool in an intelligent manner. Compared to other suction cleaners, Navigator Pro's technology also allows for silent operation. You can enjoy a pleasant and peaceful pool environment even when the Navigator Pro is hard at work.

Your pool is made more enjoyable with the Navigator Pro.

The Navigator Pro from Hayward gives you easy, trouble-free operation. You won't waste time emptying or replacing debris bags. Getting that sparkling clean pool is easy and effortless with the Navigator Pro. And because it's powered by your existing filtration system, you don't have the expense of an energy-consuming booster pump. When you install your new Navigator Pro as part of the Totally Hayward® System, you get the assurance of knowing you have a complete system, designed to work together for the best automatic operation and the cleanest pool possible.

MODEL 925ADC

Navigator Pro model for concrete pools.

MODEL 925ADV

Navigator Pro model for vinyl-liner pools.

ACCESSORIES

For pools with a dedicated suction line, Hayward recommends the Vac Lock™. It's a safety mechanism with a spring action cover, to hold the hose and close the suction opening when not in use.

The optional Leaf Canister connects in-line, trapping leaves and debris before reaching the pool's filter system. Its see-through design lets you know when to empty it.

The optional Skimmer Vacuum Plate automatically alternates between vacuuming the pool and skimming the pool's surface with each cycle of the filtration system's time clock.
