

Pinnacle®

High Performance Pump

By Pentair Pool Products®

Peak efficiency and a long list of durability and convenience features

Pinnacle® offers an unbeatable combination of performance, convenience, and long-term reliability. It features a strong, corrosion-resistant housing, an easy-to-open strainer lid, a large-capacity strainer basket, and quiet, efficient performance.

- Pump components are molded of engineered thermoplastics for superior strength, durability, and corrosion resistance.
- Transparent strainer pot lid with comfortable handle for quick inspection and easy access to strainer basket.
- Large strainer basket extends time between cleanings.
- Unique diffuser and impeller provide excellent pressure performance across a wide range of flow rates to reduce energy consumption.

Pinnacle® High Performance Pump

Superior hydraulic design delivers efficient, quiet operation

The Pinnacle® hydraulic design effectively reduces friction and turbulence to increase efficiency and minimize noise. It operates so quietly and efficiently, the last thing you'll think about is your pool pump. Additional features include:

- Commercial grade motor for efficient, dependable long-term service.
- Power end can be removed easily for service or winterizing without disturbing piping or pump support base.
- Thumbscrew drain plugs make draining and winterizing fast and easy.
- Every Pinnacle pump is performance and pressure tested prior to shipment to ensure our rigorous quality control standards are met.
- One-year limited warranty. See warranty for details.
